ABOUT

◦ A passionate and detail-oriented Computer Science Engineering student specializing in Cybersecurity, while also having a strong foundation in Software Development, Data Structures and Algorithms, and Database Management Systems. Skilled in network security, digital forensics, cryptography and secure software development.

EDUCATION

S. NO	Degree	Board/University	Percentage/ Grade
1	B. TECH (CSE)	KL University, Hyderabad	8.49
2	Intermediate (CBSE)	Shree Swaminarayan Gurukul International School	80
3	School (CBSE)	Shree Swaminarayan Gurukul International School	75

SKILL

- Basic in Java
- Basic in C
- MySQL
- Dart
- **Web Development Skills:**
 - HTML
 - CSS
 - Java Script
 - Flutter
- **Key Academic Credits:**

- Database Management Systems, Computer Networking, Basic Object-Oriented Programming, Digital Communication, Data Structures

PROJECTS

Personal Developer Portfolio (Dev's Portfolio) | HTML5, CSS3, JavaScript, Git, Netlify. Website [link](#)

- Engineered a custom portfolio website to effectively showcase frontend web development and digital image forensics projects.
- Built entirely with HTML5, CSS3, and vanilla JavaScript, heavily focusing on responsive UI/UX design to ensure flawless layout scaling and smooth interactions across both mobile and desktop environments.
- Architected a continuous deployment pipeline by linking a GitHub repository directly to Netlify, resolving directory routing configurations for automated, zero-downtime live hosting.
- Optimized multimedia asset delivery, ensuring a lightweight and performant codebase.

Obstacle avoiding robot car | C++

- This project is to design a smart robot car that automatically avoids the obstacles and controls the car system based on the used elements inside and coding. By this the robot car will detect the obstacle and move forward automatically.

Music web App (Dev Music's) | HTML, CSS, Java Script, Json, Git, Render. Website [link](#)

- This project is about to create a music web app where you can listen songs of your favourites and this applications as different features and themes to accordingly to your mood.

Digital Image Forgery Detection

- Developed a system to identify and analyse manipulated or tampered regions in digital images using image processing and CNN and reacts. Implemented algorithms to detect common forgery types such as copy move, splicing, and image retouching. Pre-processed images using noise analysis, edge detection, and block-based segmentation to extract meaningful features.

CERTIFICATIONS

- Wipro: Java advanced Object-Oriented Programming
- Automation Anywhere: Completed Advanced Automation Professional by Automation Anywhere

EXTRACURRICULAR

- **University Basketball Player**
2022- Present

- I am a dedicated and passionate basketball player representing my university team and selected as south Zone player. My journey in basketball has been marked by consistent practice, teamwork, and a deep love for the sport.

- **Video Editing**

- 2022- Present**

- I am a dedicated and passionate Video Editor. Edited YouTube content, and social media clips using AI (artificial intelligence) and CapCut. Optimized content for different platforms (Instagram, YouTube).
